

**It is very important that you read the following information!**

Thank you for scheduling a consultation. The physicians at VeinSolutions provide an initial venous screening exam that is **free of charge**. The screening exam is intended to initiate discussion of your vein problems and potential treatment, or the need for venous testing. It is not intended to be a comprehensive evaluation. With your permission and at the discretion of the physician, additional testing and office consultation may be necessary before treatment can be undertaken. You will be financially responsible for the additional testing and consultation that occurs after the initial screening. The physician will discuss your diagnosis and treatment options based on your individual situation. These options may include:

- **SCLEROTHERAPY (INJECTION THERAPY)**
- **LASER/LIGHT THERAPY**
- **VENOUS DUPLEX EXAM**
- **VENOUS SURGERY**

If sclerotherapy or laser/light therapy is recommended, you will be given an estimated fee and approximate number of treatments anticipated to achieve your desired results. **Laser/Light therapy and sclerotherapy for spider veins or reticular veins is typically considered cosmetic and is not covered by insurance companies.**

**You will be responsible for payment for sclerotherapy, medical compression stocking (dispensed by VeinSolutions), laser/light treatment and “co-pays” on the day services are rendered. We accept cash, check, MasterCard, Discover, American Express or Visa.** VeinSolutions will only file a claim that the surgeon considers “medically necessary”. **IF THE SURGEON DETERMINES YOUR CLAIM TO BE COSMETIC, VEINSOLUTIONS WILL NOT FILE YOUR CLAIM WITH YOUR INSURANCE COMPANY.**

If your insurance plan requires a referral from your primary care physician, this will need to be obtained before you can proceed with any further medically necessary treatment or testing after your initial free venous screening exam. Please inform the staff if you have this type of insurance plan. **You will be charged an office consultation when your test results are reviewed with you.** Most insurance plans cover venous duplex exam and office consultations **if** they are shown to be **“medically necessary”** as determined by the insurance company (subject to deductible and co-insurance).

If surgery is recommended VeinSolutions will obtain pre-certification of medical necessity with your insurance company before surgery is scheduled. The surgeon will clearly explain to you if any of the surgical procedure is considered “cosmetic.” It is your responsibility to furnish VeinSolutions with your current insurance card(s) and notify our office if you have any changes involving your insurance plan. It is your responsibility to verify your benefits with your insurance company, which we strongly recommend.

If you have any questions, please contact any VeinSolutions office staff at 804.330.8024 or 800.338.8799. **Please sign to verify you have received and read this information.**
